Re: Pattern: Unity without Coercive Uniformity

Date: August 5, 2019

We attach the three (3) color-coded sections to the ARK (An Introduction). The work was first released, in part as attached, in November, 2018.

The ARK is based upon **pre-existing scriptural evidence** including 107 algebraic letters forming **one pattern with shape**. The scriptural evidence in same was conveyed by GOD through several Apostles in 4 distinct Languages including HEBREW, Hindi, Greek and Arabic. The evidence is the basis of absolute Singularity or Divine Genesis on Truth, mathematics, physics, Spirituality ...

It took about 10 years and 7 months to learn the scripture of five distinct “religions” and **assemble the pre-existing evidence** to reveal the Pattern on GOD with GOD’ significant help. If a person holds any false racial, tribal, religious... prejudices GOD will frustrate the person’s understanding of the ARK to the degree of the prejudice. If you don’t hold such prejudices, but are terrible in math, you will still begin to understand and improve in math. To enjoy the consciousness on the nature of GOD through Pattern, you should keep the following **ten (10) points** in mind:

- a) The ARK’s evidence is **coded** by color, shape, number and other things e.g. **Green** is referable to HEBREW revelation, **blue** is referable to Greek revelation, and **burgundy** is referable to Arabic revelation.... Every letter, word, number...is important and intra-connected to past Apostles and other evidence.
- b) The **evidence** in the ARK **begins** in the cover page, on the relationship between the **22 single** algebraic letters in chapter **119** of the Psalms in the HEBREW Bible (e.g. the Hebrew אָלֶפֶת in English is “A”). This evidence arose in or about **500 B.C.**
- c) **Psalm 119** was connected by **GOD** through David (under the future 19th century math of **Set Theory**)¹ to Surah-Verse **19:1**. This Surah is entitled “Mary” and contains the most complex **sequence of 5 letters**. It was recited by Apostle Muhammad in the 7th century. There is a match on a **digit by digit basis** (under Set Theory) between

¹ Numbers: The Language of Science, Dantzig, Tobias, (© 2005 Pearson Education Inc.) (“Language of Science”) at pg. 7. Note: See the Preamble on The Evidence at pgs. 1, 3-4 and 10 on Set Theory and its discovery in 1873 by G. Cantor “...with God’s help”. Emphasis through color added herein.

the coordinates in Psalm 119 and Mary 19:1. This is the **starting point** of the **whole pattern**; it blossoms outward from this central area. See ARK at page 6.

- d) There is **one equation** with **five** multi-lingual terms on the **pattern** to **GOD**... **Alphabetical letters** generally preceded numbers, and were used as **quantified values**. This is an ancient form of mathematics is called **Alphabetic Numeration**. By example, the first sequence in the *Qur'an* is **ALM** and appears in *Sūrah* 2:1; the value of **ALM** with addition is as follows: **A** (1) + **L** (30) + **M** (40) = **71**. The **single** (non-sequential) letters corresponding to **ALM** in **HEBREW** have the **same value**.
- e) The **ARK** is constructed to cause the reader to reason on the **details** (e.g. correspondence in number between **119** and **19:1** under modern **Set Theory**). One must also reason further in **relationship** such as between the letters at those same **HEBREW-Arabic** coordinates of at **119** and **19:1** as a function of **Network Science**.
- f) Observe, **by example**, that there is an **Arabic Aīn** at **19:1** and there is also a **HEBREW אֵי** at **119**. The relationship exists: (i) in the coordinates to the coordinates of **119•19:1**; (ii) in the appearance of similar letters of **אֵי • Aīn** at those coordinates; and (iii) in the historical values of **70** to both letters of **אֵי • Aīn**.
- g) These **TRUTH** are “**seen**” primarily by **reason**; not physical vision. Those who understand **GOD** or judge **people** or **TRUTH** based upon **outer characteristics** such as the **Language** of revelation; or **NATIONALITY**; or **race**; or **money** fail. The **journey in your Earthly life determines, your judgment in the after-life**.
- h) The above evidences **Singularity** - the root of ultimate **TRUTH** on **Divinity** but there are opposing forces to same in life. These forces are symbolically present in the Ark e.g. **complexity** in evidence such on **CONFUCIUS**' addressing animal patterns in link with the alphabetic **PATTERN** or **apparent typo** in the **Ark**.
- i) There are, however, **6** primary points in the introduction and these are plainly set out on page 7 of the Ark. You will see here that **GOD** expressly testifies that “**I am 'A'**” in **HEBREW** and “**I am the Alpha...**” in **GREEK**. God is not a **racist**, but many “**religions**” are or worse.² Denial of the **impossible** is a **self-imposed** disability.

All the best to you, on your individually tailored journeys.³

² The methodology used in the Ark was first simply applied to evidentiary networks in our 2008 textbook on law entitled “*Demonstrative Advocacy*” to constrain judicial bias e.g. **racism**. I was an **atheist** at the time my publisher received the manuscript on the book in early 2008; before I visited Rome and saw the breathing face **horror**. There is no exit, only choice of direction. The **ARK** shows the path towards friendship with **GOD**.

³ You will face obstacles from **GOD** but only those which you can bear with own growing **inner** strength.
